Profile

QA Engineer with 3+ years of commercial experience, including 2+ years in banking and FinTech projects.

Relocating to Belgrade, Serbia in September 2026.

Experienced in testing complex systems across web, mobile, backend, APIs, payment terminals, and integrations. My work includes functional, regression, integration, smoke, exploratory, and acceptance testing, as well as end-to-end validation of business-critical scenarios.

Strong hands-on experience with REST API testing using Postman and Swagger, backend data validation using SQL/PostgreSQL, and defect investigation through application logs and Kibana.

I have also worked with test documentation, migration testing, telemetry, GPS-related functionality, and banking payment systems. I have experience identifying critical defects before production releases, participating in major releases, improving test coverage, maintaining test cases, and collaborating closely with developers, analysts, and QA engineers in Agile/Scrum teams.

Core skills: Manual Testing • API Testing • Backend Testing • Web & Mobile Testing • REST API • Postman • Swagger • SQL • PostgreSQL • Kibana • Charles Proxy • DevTools • TestIT • Jira

Open to QA opportunities in Serbia and international remote teams.

Work Experience

Quality Assurance Specialist

VTB

06/2025 - present | Russia

Work Experience

- Performed functional, regression, integration and API testing for banking systems.
- Tested REST APIs using Postman and Swagger.
- Validated backend data using SQL/PostgreSQL.
- Investigated defects using application logs and supporting tools.
- Participated in migration testing and validation of migrated data/functionality.
- Created and maintained test cases, checklists and defect reports.
- Collaborated with developers, analysts and other QA engineers throughout the development lifecycle.

Quality Assurance Specialist

RNCB

06/2024 - 07/2025 | Russia

- Performed functional, regression, integration, smoke, exploratory, acceptance, and UI testing of banking and payment systems.
 - Tested payment terminals, validators, web services, Android applications, backend and frontend functionality, telemetry, and GPS-related features.
 - Performed end-to-end testing of payment and transaction scenarios, including payments, cash operations, receipts, error handling, and terminal-to-server communication.
 - Tested REST APIs using Postman, including payment operations, customer benefit data, terminal coordinates, remote terminal management, and report data validation.
 - Used SQL (SELECT, JOIN) to validate data after transactions, verify backend records, and investigate inconsistencies.
 - Analyzed application logs using Kibana and internal monitoring and diagnostic tools to investigate defects and system behavior.
 - Created, reviewed, and maintained test cases in TestIT and contributed to test reports.
-

Work Experience

- Reported and tracked defects in Jira, including critical issues identified before production releases.
- Participated in major releases, regression testing, test case improvements, and optimization of testing activities.
- Collaborated closely with developers, analysts, QA engineers, and other teams throughout the software development lifecycle.
- Worked in an Agile/Scrum development environment.

Customer Support Specialist

RNCB
05/2023 - 07/2024 | Russia

- Provided customer support via the bank's hotline, assisting clients with banking products, services, transactions, and technical issues.
- Analyzed customer requests and incidents, identified possible causes of issues, and provided solutions within the scope of the support process.
- Worked with internal banking systems to verify customer and transaction information and resolve service-related issues.
- Registered and escalated incidents requiring investigation by specialized or technical teams.
- Collaborated with related departments to resolve complex customer cases and ensure proper follow-up.
- Developed a strong understanding of banking products, business processes, customer scenarios, and cross-team communication.
- Gained practical experience in incident analysis and cross-team communication, which later supported the transition into a software testing role within the bank.

Road & Infrastructure Planning Specialist

Institute shelf
11/2022 - 12/2022 | Russia

- Participated in the planning and design of road infrastructure, including sections of the Tavrida Highway, a major regional transport infrastructure project.
- Developed road alignments and planning solutions in accordance with technical requirements, site constraints, and existing infrastructure.
- Assisted in planning territories for gas distribution stations, taking into account permitted land-use boundaries, regulatory restrictions, and special site requirements.
- Prepared engineering and technical documentation for roads, highways, and access routes within residential and courtyard areas.
- Worked with site plans, infrastructure layouts, territorial boundaries, and engineering documentation.
- Collaborated with engineers and specialists from related disciplines to coordinate road, infrastructure, and territorial planning solutions.

Work Experience

- Prepared engineering and technical documentation for roads, highways, and access routes within residential and courtyard areas.
- Worked with site plans, infrastructure layouts, territorial boundaries, and engineering documentation.
- Collaborated with engineers and specialists from related disciplines to coordinate road, infrastructure, and territorial planning solutions.

Architect

Institute shelf
09/2022 - 11/2022 | Russia

- Designed public and residential outdoor spaces, including courtyards, parks, and urban squares.
- Developed landscape and architectural design solutions from initial concepts to detailed project documentation.
- Created 3D visualizations to present proposed design concepts and spatial solutions.
- Prepared and updated drawings, plans, and technical documentation.
- Collaborated with engineers and specialists from related departments to coordinate design solutions and project requirements.

Education

Professional Retraining Diploma, Software Testing / Quality Assurance

Yandex Practicum
01/2024 - 01/2024 | Russia

Bachelor's Degree, Landscape Architecture

V.I. Vernadsky Crimean Federal University
01/2018 - 01/2022 | Russia
