

Natalia Lebedinskaya

QA Engineer · Manual / API / Backend / Mobile · Fintech & AI

lebedinskayanataliaqa@gmail.com · Telegram @Natalia2uo · linkedin.com/in/natalia-lebedinskaya-115512422 · github.com/natalia-lebedinskaya

PROFILE

QA Engineer with 2+ years of hands-on experience across banking, fintech, and AI products. I test web/mobile interfaces, REST APIs, and backend flows; validate PostgreSQL data with SQL; maintain test documentation; and support regression and release checks. Strong in business-critical financial scenarios, defect investigation, and clear collaboration with development and product teams.

Target: QA Engineer / Manual QA / API QA role in Serbia. Open to relocation; Belgrade or Novi Sad for office/hybrid work, any Serbian city for fully remote work. Salary expectation: from USD 1,200 per month. Russian-speaking work environment preferred; English A1 and actively improving.

CORE SKILLS

Manual, functional, regression, smoke, integration, exploratory and mobile testing; test design; test cases; checklists; bug reports; defect analysis; release validation; REST API; Postman; Swagger/OpenAPI; SQL; PostgreSQL; DBeaver; Jira; Test IT; Mantis; Charles Proxy; Chrome DevTools; working exposure to Kafka and Kibana; Git/GitHub; Playwright fundamentals.

EXPERIENCE

Product QA · AI products (independent part-time work) | May 2026 — Present

- Test mobile/web AI product flows: profiles, image uploads, generation, history, payments, and release readiness.
- Check API flows, negative and edge cases; create reproducible defect reports and QA documentation.
- Contribute to FOT AI, a Telegram Mini App using an external AI provider and USD/VND payment flows.

QA-focused Specialist · confidential fintech organization | Jun 2025 — Present

- Test an internal client-data migration service and design functional and regression coverage.
- Validate PostgreSQL data with SQL and investigate inconsistencies across UI/API/backend behavior.
- Clarify expected behavior, verify fixes, and support release-readiness decisions.

QA Engineer · banking technology | Jul 2024 — Jun 2025

- Tested terminal software and financial-operation scenarios using functional, API, and regression testing.
- Validated responses in Postman and data with SQL; maintained test cases, checklists, and defect reports.

Banking Client Support Specialist · financial services | Mar 2023 — Jul 2024

- Worked with customer and financial processes, reproduced product issues, and built strong fintech domain knowledge.

EDUCATION & RECOGNITION

- Professional retraining diploma in Software Testing Engineering.
- QA course, Yandex Educational Technologies (2024): test design, web/mobile, API, SQL, and client-server architecture.
- Two internal VTB NFC recognition certificates (2025) for team contribution and high-quality collaboration.
- Bachelor's degree.

LANGUAGES & WORK PREFERENCES

Russian and Ukrainian — native. English — A1, studying regularly. Open to relocation to Serbia; prefer official employment, company-provided equipment, and Russian-speaking daily communication.
