natalia-lebedinskaya.github.io/portfolio

QA Engineer with 3+ years of commercial experience, including 2+ years in banking and FinTech projects. Strong in Manual, API, Backend, SQL/PostgreSQL validation, Web & Mobile testing, logs/Kibana and release-critical defect investigation.

Recruiter fit

Target: Middle Manual QA / API QA	Level: Middle QA Engineer	Salary target: from \$1100/month
Availability: remote start; Serbia-focused	Work format: Belgrade office/hybrid first	Communication: RU/UA native; English A1

Profile

Middle QA Engineer with 3+ years of commercial experience, including 2+ years in banking and FinTech projects. Experienced in testing complex systems across web, mobile, backend, APIs, payment terminals and integrations. My work includes functional, regression, integration, smoke, exploratory and acceptance testing, plus end-to-end validation of business-critical scenarios. Strong hands-on practice with REST API testing in Postman/Swagger, backend data validation with SQL/PostgreSQL, defect investigation through application logs and Kibana, test documentation, migration testing, telemetry, GPS-related functionality and banking payment systems.

Core stack

Manual QA	API testing
Backend QA	REST API
Postman	Swagger
SQL	PostgreSQL
Kibana	Charles Proxy
DevTools	TestIT
Jira	Regression
Integration	Smoke
Exploratory	Acceptance
Web QA	Mobile QA

Tools: Postman, Swagger/OpenAPI, REST API, SQL, PostgreSQL, DBeaver, TestIT, Jira, Chrome DevTools, Charles Proxy, Kibana, application logs, Kafka basics, Kubernetes basics, Git/GitHub, Linux/Windows, Excel/Google Sheets.

Languages: Russian - native; Ukrainian - native; English - A1, actively studying; Serbian - beginner

Location target: Belgrade, Serbia is the first priority. Open to office/hybrid in Serbia and remote international work from Serbia. Russian-speaking teams or beginner-friendly English/Serbian communication are preferred.

Experience

Software Testing Specialist

VTB Bank | Jun 2025 - Present | 1 yr 3 mos

- Test internal banking services and client-data migration scenarios across UI, API/backend behavior and PostgreSQL data integrity.
- Design focused test cases, checklists and regression coverage for risk areas: data consistency, edge cases, service responses and release readiness.
- Investigate failures with developers and adjacent teams, localize reproducible conditions and turn ambiguous issues into actionable defect reports.

QA Engineer

RNKB Bank | Jul 2024 - Jun 2025 | 1 yr

- Tested a federal public-transport payment product, dispatcher and driver services, GPS/telemetry and terminal-related scenarios.
- Covered functional, integration, API and regression checks using Postman, Swagger, Test IT, SQL and Excel.
- Completed onboarding and moved to independent project work in 2 weeks; prepared clear defects and supported release validation.

Banking User Support Specialist

RNKB Bank | Mar 2023 - Jul 2024 | 1 yr 5 mos

- Resolved customer and financial requests in a high-volume banking environment, building practical domain knowledge of user pain points and operational flows.
- Reproduced issues, documented context and coordinated resolution with adjacent departments - a foundation for clear QA investigation and bug reporting.

Experience

Product QA

Independent AI web/mobile products | May 2026 - Present | 4 mos

- Test user journeys, mobile UI, Telegram Mini App flows, AI generation, API/payment scenarios, edge cases, fixes and release readiness.
- Use product QA thinking: validate not only whether a feature works, but whether the user can recover from errors and complete the intended flow.

Selected QA impact

- Identified release-critical defects before production and helped teams reduce ambiguous behavior into reproducible, prioritized issues.
- Supported major banking releases with API/backend checks, data validation and regression coverage around business-critical user flows.
- Strengthened test coverage through clear cases, checklists, negative scenarios and close collaboration with developers, analysts and QA teams in Agile/Scrum.

Selected product QA projects

CareerMove - private job-search and application-tracking product; QA of aggregation, matching, deduplication, auth, persistence, Telegram/Google Sheets integrations and Serbia-focused vacancy filtering.

FOT AI - Telegram Mini App for event photo generation; QA coverage for requirements, negative scenarios, mobile flow, API/payment logic and release checks. [GitHub](#)

Education

Higher education: Landscape Architecture / Architecture and Design background - useful for visual accuracy, spatial thinking and detailed UI review. Professional retraining: Software Testing Engineer.

Certifications

Yandex Educational Technologies: QA / Software Testing course, completed 18 Apr 2024.

Recognition

VTB NFC Award for Outstanding Contribution to Key Business Results (H1 2025) and Award for Excellence in Team Collaboration (2025).
