PROFILE

Manual QA / API QA specialist with 2+ years of hands-on QA and 3+ years in banking and fintech. Experience testing banking services, client-data migrations, public-transport payment products, terminal flows, web/mobile AI products and Telegram Mini App scenarios. Strong in requirements analysis, API/backend validation, SQL data checks, regression, defect investigation, test documentation and clear user-facing bug reports. Focused on Serbia: office/hybrid roles in Belgrade are the first priority, other Serbian cities are open, and international remote work from Serbia is also suitable.

SKILLS AND PROFICIENCY

Strong: Manual, functional, regression, smoke, integration and exploratory testing; requirements analysis; test design; test cases; checklists; actionable bug reports; Postman; REST API; SQL; PostgreSQL; Swagger/OpenAPI

Working knowledge: DBeaver, Kafka, Kibana, Kubernetes, Linux/Windows, Test IT, Chrome DevTools, Charles Proxy, Git/GitHub, mobile and web testing, Telegram bot and Mini App testing, release validation

Fundamentals: Playwright, test-automation concepts, HTML/CSS/JavaScript basics for QA communication

Soft skills: Analytical thinking, clear written communication, ownership, cross-functional collaboration and user empathy

Languages: Russian and Ukrainian - native; English - A1, actively studying; Serbian - beginner

EXPERIENCE

Software Testing Specialist | VTB Bank | Jun 2025 - Present

- Test internal banking services and client-data migration scenarios; validate UI, API/backend flows and SQL/PostgreSQL data integrity.
- Create test cases, checklists and defect reports; investigate failures, localize root conditions and support regression and release validation with development and adjacent teams.

QA Engineer | RNKB Bank | Jul 2024 - Jun 2025

- Tested a federal public-transport payment product, dispatcher and driver services, GPS/telemetry and terminal-related scenarios through functional, integration, API and regression checks.
- Used Postman, Swagger, Test IT, SQL and Excel; prepared clear defects and completed onboarding to independent project work in 2 weeks.

Banking User Support Specialist | RNKB Bank | Mar 2023 - Jul 2024

- Resolved customer and financial requests in a high-volume contact center; reproduced issues, documented context and coordinated resolution with adjacent departments.

Product QA | Independent AI web/mobile products | May 2026 - Present

- Test user journeys, mobile UI, Telegram Mini App flows, AI generation, API and payment scenarios, edge cases, fixes and release readiness.

SELECTED PET PROJECTS

CareerMove (private pet project) - job-search and application-tracking web app; QA of aggregation, filtering, deduplication, auth, persistence, Telegram/Google Sheets integrations and Serbia-focused matching logic.

FOT AI - Telegram Mini App for event photo generation; requirements, negative scenarios, API and payment-flow coverage, and release checks. [GitHub](#)

EDUCATION AND RECOGNITION

Professional retraining diploma - Software Testing Engineer. QA Course - Yandex Educational Technologies, 18 Apr 2024. VTB NFC Award for Outstanding Contribution to Key Business Results (H1 2025) and Award for Excellence in Team Collaboration (2025).

Priority: Belgrade office/hybrid QA role | Open to Serbia and remote from Serbia
