Recruiter fit

Target: Manual QA / API QA / Product QA	Seniority: junior+ / middle- manual QA track	Salary target: from \$1100/month
Availability: remote start; Serbia-focused	Work format: Belgrade office/hybrid first	

Profile

Manual QA / API QA specialist with 2+ years in hands-on testing and 3+ years in banking/fintech operations. I test complex product flows where quality depends on more than UI: API contracts, backend behavior, SQL data integrity, payment/terminal scenarios, migration logic and release risk. My strongest value for recruiters is the combination of QA discipline, fintech domain understanding, clear bug communication and fast onboarding into product context.

Core stack

Manual QA	API testing
Postman	SQL
PostgreSQL	Swagger
Regression	Test cases
Checklists	Bug reports
Mobile QA	DevTools

Tools: Postman, Swagger/OpenAPI, SQL, PostgreSQL, DBeaver, Test IT, Chrome DevTools, Charles Proxy, Kafka, Kibana, Kubernetes basics, Git/GitHub, Linux/Windows.

Languages: Russian - native; Ukrainian - native; English - A1, actively studying; Serbian - beginner

Location target: Belgrade, Serbia is the first priority. Open to office/hybrid in Serbia and remote international work from Serbia.

Russian-speaking teams or beginner-friendly English/Serbian communication are preferred.

Experience

Software Testing Specialist

VTB Bank | Jun 2025 - Present | 1 yr 3 mos

- Test internal banking services and client-data migration scenarios across UI, API/backend behavior and PostgreSQL data integrity.
- Design focused test cases, checklists and regression coverage for risk areas: data consistency, edge cases, service responses and release readiness.
- Investigate failures with developers and adjacent teams, localize reproducible conditions and turn ambiguous issues into actionable defect reports.

QA Engineer

RNKB Bank | Jul 2024 - Jun 2025 | 1 yr

- Tested a federal public-transport payment product, dispatcher and driver services, GPS/telemetry and terminal-related scenarios.
- Covered functional, integration, API and regression checks using Postman, Swagger, Test IT, SQL and Excel.
- Completed onboarding and moved to independent project work in 2 weeks; prepared clear defects and supported release validation.

Banking User Support Specialist

RNKB Bank | Mar 2023 - Jul 2024 | 1 yr 5 mos

- Resolved customer and financial requests in a high-volume banking environment, building practical domain knowledge of user pain points and operational flows.
- Reproduced issues, documented context and coordinated resolution with adjacent departments - a foundation for clear QA investigation and bug reporting.

Experience

Product QA

Independent AI web/mobile products | May 2026 - Present | 4 mos

- Test user journeys, mobile UI, Telegram Mini App flows, AI generation, API/payment scenarios, edge cases, fixes and release readiness.
- Use product QA thinking: validate not only whether a feature works, but whether the user can recover from errors and complete the intended flow.

Selected product QA projects

CareerMove - private job-search and application-tracking product; QA of aggregation, matching, deduplication, auth, persistence, Telegram/Google Sheets integrations and Serbia-focused vacancy filtering.

FOT AI - Telegram Mini App for event photo generation; QA coverage for requirements, negative scenarios, mobile flow, API/payment logic and release checks. [GitHub](#)

Education

Professional retraining diploma - Software Testing Engineer. QA Course - Yandex Educational Technologies, 18 Apr 2024.

Recognition

VTB NFC Award for Outstanding Contribution to Key Business Results (H1 2025) and Award for Excellence in Team Collaboration (2025).
